Shell scheme corner, fabric can flow the corner or use extrusion to hold fabric at 90°

1. Attach 2 top clips to first ShowSuit top rail, match Clip ▲ to Rail ▲ and click on, then hook rail on top of shell scheme. Free the bottom rail then hang next top rail. Repeat - top rail, bottom rail, all 1m sections.
2. Position close together the ShowSuit rail ends at corner(s) of shell scheme.
3. Attach 2 bottom clips to each ShowSuit bottom rail, hook under shell scheme and tension strap. For a final tight adjustment gently pull rail down and re-tighten the strap at the same time.
4. If 2 ShowSuit fabrics meet at a corner fold vertical edges behind to make a neat join.
5. Or.. If ShowSuit is in 1 piece push flexible extrusion pieces into shell scheme corner slot to add tension to the fabric.
6. At end of shell scheme fabric simply tuck, fold and crease the ShowSuit fabric behind itself for a neat finish.

ShowSuit Clips x1 set per metre

Top clips

Bottom clips
